

HOW TO GROW MINT FROM CUTTINGS

Mint is a fun & easy herb to grow in your indoor garden. It's tasty & smells great! Mint is much faster to grow from a plant cutting, than from a seed. You can even leave your cuttings in water. Simply set them by a window and watch the roots grow & grow!

Materials

SCISSORS OR PRUNERS

POT

A GLASS & WATER

POTTING SOIL

MINT PLANT

YOU CAN GROW MANY DIFFERENT KINDS OF HERBS USING THIS METHOD OF TAKING CUTTINGS!

STEP 1: CUT A SPRIG OF MINT FROM PLANT.

Remove the lower leaves and cut the stem just below the leaf node (the point on the stem where leaves emerge).

STEP 2: PLACE MINT CUTTING IN JAR WITH WATER. WATCH FOR ROOT HAIRS TO FORM.

root hairs appear in a few days!

STEP 3. ONCE ROOT HAIRS FORM, PLANT MINT CUTTING INTO A NEW POT WITH POTTING SOIL.

STEP 4. FIRM SOIL AROUND STEMS AND WATER WELL.

You may top dress with rich compost or add fertilizer in the proper ratio to soil volume.

TIP: You can plant multiple sprigs of mint into one pot for a fuller plant.
